

## Instrumental Methods of Analysis in Biotechnology

By Dinesh Kumar Chatanta, Prahlad Singh Mehra

I.K. International Publishing House Pvt. Ltd., 2012. Paperback.  
 Book Condition: New. 16cm x 24cm. Instrumental Methods of Analysis in Biotechnology is an attempt to give an overview of instrumentation and techniques used in biotechnology and other related fields of biological sciences. Salient feature of the book are:   
 ò Covers the various types of microscopes, centrifugation techniques used in separation of biomolecules, chromatographic techniques used in separation of biological molecules with special reference to HPLC and GC techniques,   
 ò Covers the techniques used for purification of nucleic acids, PCR techniques and various electrophoretic techniques,   
 ò Focuses on various spectrophotometric techniques used in biochemical analysis and Mass spectroscopy covers the principle and applications of Raman, Infra-red spectroscopy, NMR, ESR and Magnetic Resonance Imaging (MRI),   
 ò Includes Radioisotopic techniques such as GM and Scintillation counters and RIA, ELISA. This book also discusses the various approaches used in determination of microbial growth with emphasis on FACS and coulter counter techniques. This book serves as a valuable source of information for students, teachers and researchers pursuing their study in biotechnology and other biological sciences courses of various Universities.

### Reviews

*Absolutely essential go through publication. I am quite late in start reading this one, but better then never. You will not feel monotony at any time of the time (that's what catalogues are for regarding if you ask me).*

-- Ambrose Thompson II

*This ebook is so gripping and intriguing. Better then never, though i am quite late in start reading this one. You wont really feel monotony at whenever you want of your own time (that's what catalogues are for about in the event you check with me).*

-- Ian Wisoky
